

HydroFree[®]

HydroFree is an industrial high strength carburized electrogalvanized chain

- High wear resistance due to high surface hardness

- Stable corrosion resistance by continuous treatment

Salt spray test *JIS Z 2371

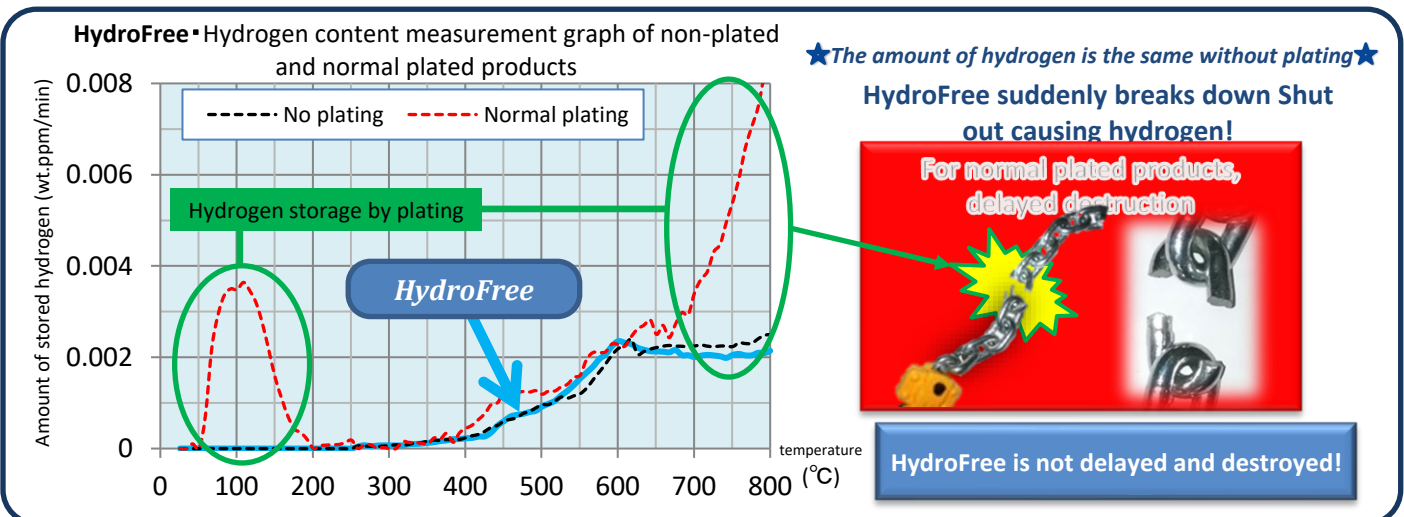

Time	Other electro galvanized Chain	HydroFree
In 24 hours	Light corrosion	Minimal corrosion
In 72 hours	Significant corrosion	Minimal corrosion
In 504 hours	Severe corrosion, fracture	Minimal corrosion, intact

★Proof of high corrosion resistance★
HydroFree by continuous processing
High quality and stable finish

Danger of red rusting
Other products 96 hours ⇒ Fatigue test ⇒ Fracture

HydroFree has 504 hours of goods
The fatigue test is also clear!

- Unique plating method without delayed fracture ^{* Patented} (Japanese Patent No.7140624)
